

```
1) int d; // days until deadline
```

Este mai corect sa punem comentariul inaintea liniei de cod, nu in dreapta

```
// days until deadline  
int d;
```

2)

```
// if the student is at least 18 years of age  
if (student.Age >= 18)  
{  
    // send meeting invitation to the student  
    notificationService.SendMessageTo(student, meetingInvitation);  
}  
else // if the student is younger than 18 years  
{  
    // sends a meeting invitation to the student's legal guardian  
    notificationService.SendMessageTo(student.Parent, meetingInvitation);  
}
```

In acest caz se face abuz de comentarii astfel de comentarii nu sunt binevenite deoarece insotesc un segment de cod care si asa este foarte bine inteles.

3)

```
// student is eligible for blood donation  
if (student.Age >= 17 && student.Weight >= 58.0 && student.Height >= 1.55)  
{  
    ScheduleBloodDonatingSessionWith(student);  
}
```

Comentariul pare a fi destul de ok
